RE: Response to OSHPD Public Release of AHRQ Hospital Inpatient Mortality Indicators, 2010
and 2011 letter
received January 29, 2013

Dear Ms. Holliday-Hanson:

Madera Community Hospital (MCH) supports public reporting of quality data. Our primary focus is, and continues to be, the care of our patients. As quality measures have increased so has our focus on documentation. The implementation of the Electronic Medical Record has significantly increased our ability to capture the documentation that contributes to how scores are determined.

Sincerely,

John Frye, Jr., CEO
Madera Community Hospital
