

## California Healthcare Workforce Policy Commission Statutory Criteria Evaluation Model

The California Healthcare Workforce Policy Commission (Commission) will now be using a predetermined point system for the evaluation of the three statutory criteria: (1) Placement of graduates in areas of unmet need; (2) Attracting and admitting underrepresented minorities and/or economically disadvantaged groups to the program; and (3) Location of the program and/or clinical training sites in areas of unmet need. The 3 statutory criteria will be worth 15 points each.

The Commission’s Evaluation Worksheet Taskforce selected a hybrid approach to score each of the three statutory criteria. This approach measures both percentage (see part 1 below) and numbers (see part 2 below) achieved by programs for each of the three statutory criteria. The percentages are worth up to 9 points and will be determined by fixed percent ranges. The numbers are worth up to 6 points and will be determined by a normal distribution. Part 1 and Part 2 will be added together to determine the final points for each criteria. These points will be prepopulated by staff and reflected in the commissioner worksheets. The following document demonstrates how the two parts will be broken down using the “Graduates in Areas of Unmet Need” criteria as an example.

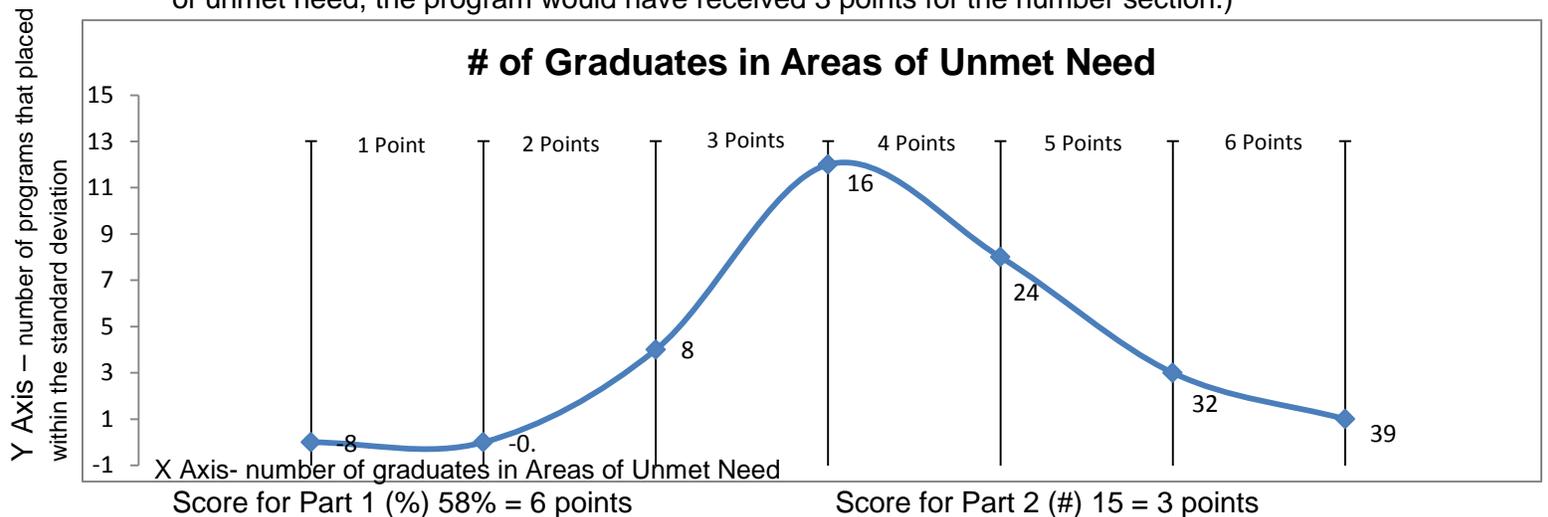

### Part 1 Percentages (%) up to 9 points

Part 1 will be determined by the range of percentages the program falls under. (For example, if Program X has 58 % of graduates in areas of unmet need, the program will receive 6 points for part 1)

% of Graduates in Areas of Unmet Need	Points
1-16 %	1.5
17-33%	3
34-50%	4.5
51-67%	6
68-84%	7.5
85-100%	9

### Part 2 Numbers (#) up to 6 points

Part 2 will be determined by the programs placement in a normal distribution. The normal distribution method uses the mean score as the midpoint, and uses the standard deviation to determine point brackets. (For example, if Program X would have placed 15 graduates in areas of unmet need, the program would have received 3 points for the number section.)

Program X total Score for Criteria: Part 1 (6 points) + Part 2 (3 points) = 9 points
