

**Researcher Data Request Process Instructions**

**Before Starting**

<b><u>Confirm Eligibility</u></b>	OSHPD is authorized to disclose “minimum necessary” versions of its patient-level data files to: <ul style="list-style-type: none"> <li>• Researchers with nonprofit educational institutions/universities</li> <li>• Certain State agencies</li> </ul>
<b><u>Review Data Sets</u></b>	<ul style="list-style-type: none"> <li>• Types of OSHPD Patient-Level Data</li> <li>• Master Variable Grid</li> </ul>

**Researcher Request Process**

<b><u>Step 1</u></b>	Submit Preliminary Request Packet to <a href="mailto:Dataandreports@OSHPD.CA.gov">Dataandreports@OSHPD.CA.gov</a> <ul style="list-style-type: none"> <li>• If New Request use the <a href="#">Researcher Request Form [HDR-409]</a></li> <li>• If requesting additional data, for a previously approved project, with a current CPHS protocol use the <a href="#">Supplemental Research Data Set Request Form [OSH-ISD-511]</a></li> </ul>
----------------------	--

**Instructions for Request Packet**

1. **Do not sign** this version of the request form. There may need to be changes made per data stewardship requirements.
2. **Do not create a PDF.** Please submit your request form as a word document so that changes can be made.
3. Include a PDF of your DRAFT California Protection of Human Services (CPHS) Protocol.
 

**Note:** CPHS is housed at OSHPD but is not an OSHPD unit.
4. The Principal Investigator must be registered on the CPHS website at: <https://www.oshpd.ca.gov/Boards/CPHS/> Follow the CPHS instructions for completing a draft protocol. An OSHPD request submitted without a draft protocol will be asked to complete the request packet and resubmit.
5. Complete the Justification Grids for each data set.
6. A Memorandum of Understanding (MOU) or a Data Use Agreement (DUA) between the primary University and any collaborating University must be included if employees from the collaborating university will have the access to patient level data.
7. A letter of sponsorship for this specific research project from the Department Director (California state agencies) or Department Chair at the sponsoring university/institution on university letterhead must be included.
 

**Note:** Must be current within 12 months of request.

- 8. Please include a copy of the IRS 501(c)(3) certificate with the request package. For-profit universities are not eligible for this data.
- 9. Please include a letter from the primary University IT department on official University Letterhead.
 

**Note:** Must be current within 12 months, letter used for CPHS is fine if current.
- 10. If using a contractor, please include a copy of the contract.

<b><u>Step 2</u></b>	Receive Pre-CPHS letter and submit CPHS Research Protocol <ul style="list-style-type: none"> <li>• Once the request appears complete, OSHPD will send the contact listed in the preliminary request package a “Pre-CPHS Letter” which should be used as the department support letter when submitting the final draft CPHS Protocol.</li> </ul>
----------------------	---

<b><u>Step 3</u></b>	OSHPD Review
----------------------	--------------

Once the CPHS Research Protocol has been approved by CPHS, the request will be submitted to the OSHPD Non-Public Data Request review with the approved CPHS Protocol. If there are any questions about the request during this part of the process, an analyst will contact the requester with further instructions or correction requests.

**Areas to Review**

The following are common areas that may cause a review analyst to return the request for further information. This is not an exhaustive list so please review your request completely.

- CPHS protocol must be current and approved or in process.
 

**Note:** CPHS protocol must match the OSHPD request. This includes purpose and narrative, data storage plans, data access plans, personnel, and Principal Investigator (PI).
- The PI must be from the sponsoring university.
- Only the sponsoring university may host the data and grant access. Host universities cannot make copies of the data but can share on networks or load on server. Data cannot be downloaded from host servers for use outside of host university.

**Note:** Data must be stored on host university servers. Access can be granted via non-downloadable VPN for outside entities and contractors if they are not onsite at the host university or in some cases, at OSHPD (some exceptions made for some California State departments).

- Data access roles must be defined for each research team member accessing patient level files (affiliation, job title, role on project); the Data Use Agreement must list all names of team members listed in OSHPD application.
- Any MOUs between collaborating universities must be included and must outline access to data, explaining how access to the data will be granted to the non-host, and what the MOU is allowing and why the universities are collaborating on the project.

**Note:** OSHPD data cannot be copied and shared. Data must be stored on servers owned and operated by the accountable Sponsoring University.

- All personnel must be listed in the application. Personnel changes to prior request must be noted in the supplemental application.
- Any collaborating outside organizations must have a current contract included that explains contractual obligations, how access will be granted to the organization, and what the role is for the outside party utilizing the data for analysis or monitoring.

**Note:** All contractors must be listed on the DUA if accessing the patient level data. All contractors must be listed in the original data request or updated in the supplemental application if added later. Contracts for contractors added to supplemental form must be included in supplemental request.

- If data will be linked to any non-OSHPD data sets, include the approval letter for use of the data set. Ensure that linkage methodology is clear (i.e., finder file used at OSHPD, or probabilistic linkage, etc.) Any language that clearly states that the data will not be used to reidentify an individual during linkage is useful for the OSHPD decision process.
- The signed DUA and Request form must be current. An OSHPD analyst will send the unsigned DUA and unsigned request form to the requester for signature. Sign, scan and email the forms back to the assigned OSHPD analyst. All DUAs must be included for final review.

**Note:** *For graduate students requesting data, the Faculty Advisor must also sign the request form.*

**Step 4**

Request Approved

When the request has been approved by OSHPD, the Principal Investigator or authorized designee will receive the following items via email:

- A copy of the complete request with an OSHPD Request Number, date received, and date revised.
- A copy of the JUSTIFICATION GRIDS for each data set with a Request Number, date received, and date revised.

- A copy of the signed Data Use Agreement (DUA). The Data Use Agreement must list everyone who will be accessing patient-level data, as listed in the request.
- A signed OSHPD approval letter

**Note:** If you are only requesting PDD, ED or AS data, you will be contacted to arrange data delivery. If you are requesting Linked Death or Linked Birth data of any kind, you will undergo an additional approval process outlined below.

**Step 5**

Requests containing PDD/Linked Birth or PDD/Linked Death data

Requests for PDD/Linked Birth or PDD/Linked Death data must also go through the California Department of Public Health (CDPH) approval process. The Vital Statistics Advisory Committee (VSAC) will review the request. OSHPD will forward the following forms to VSAC directly:

- Signed California Department of Public Health's (CDPH) Information, Security, and Privacy Requirements (IPSR) Form.
- CV/Resume.

**Note:** The OSHPD analyst will forward all signed documents directly to VSAC on the requestor's behalf but cannot be intermediary for questions VSAC has for the requester. The requester will be Cc'd when the initial request packet is sent to VSAC and OSHPD will be Cc'd on communications between the VSAC and the requester. Once VSAC has approved the request, OSHPD is notified and then will arrange to ship or SFTP the data from OSHPD to the named recipient. VSAC determines approval for use of the birth certificate and death certificate data that comprise part of the PDD/Linked Birth and PDD/Linked Death data. The requester must forward all questions related to that process to [HIRS@CDPH.CA.GOV](mailto:HIRS@CDPH.CA.GOV) . Please be aware there may be charges for data usage.
