ACCOUNTING AND REPORTING MANUAL FOR CALIFORNIA HOSPITALS

**ACCOUNT DISTRIBUTION INDEX**

**PREFACE**

**3001**

As stated previously, the purpose of this manual is to set standards for uniform hospital accounting and reporting. The Account Distribution Index serves as a reference for proper classification of expenses for supplies and services not separately charged to patients. The invoice cost of all supplies sold to patients must be recorded in the Medical Supplies Sold to Patients cost center (Account 7470). The invoice cost of all pharmacy items sold to patients must be recorded in the Drugs Sold to Patients cost center (Account 7710). All other expenses related to patient-chargeable and non-chargeable items are to be charged to the Central Services and Supplies cost center (Account 8370) or to the Pharmacy cost center (Account 8390), as appropriate.

**ACCOUNT DISTRIBUTION INDEX**

**HOW TO USE THE ACCOUNT DISTRIBUTION INDEX**

**3010**

Each page of the Account Distribution Index lists various types of non-chargeable supplies and services and the cost center and natural classification to which they should be charged as expenses. In many cases, the cost center which originally receives the supply items is not the cost center to which the supply expense should be charged. For instance, although non-chargeable sutures may be received in the Central Services and Supplies cost center and charged to inventory, upon requisition they are sent to a Surgery cost center and their cost (as defined in the "Interdepartmental Transfers" section 1103 of this manual) must be transferred interdepartmentally to that using cost center. It is this using cost center which is indicated in the Account Distribution Index. All expenses related to patient-chargeable items are to be charged to the Medical Supplies Sold to Patients or Drugs Sold to Patients cost centers (Accounts 7470 and 7710).

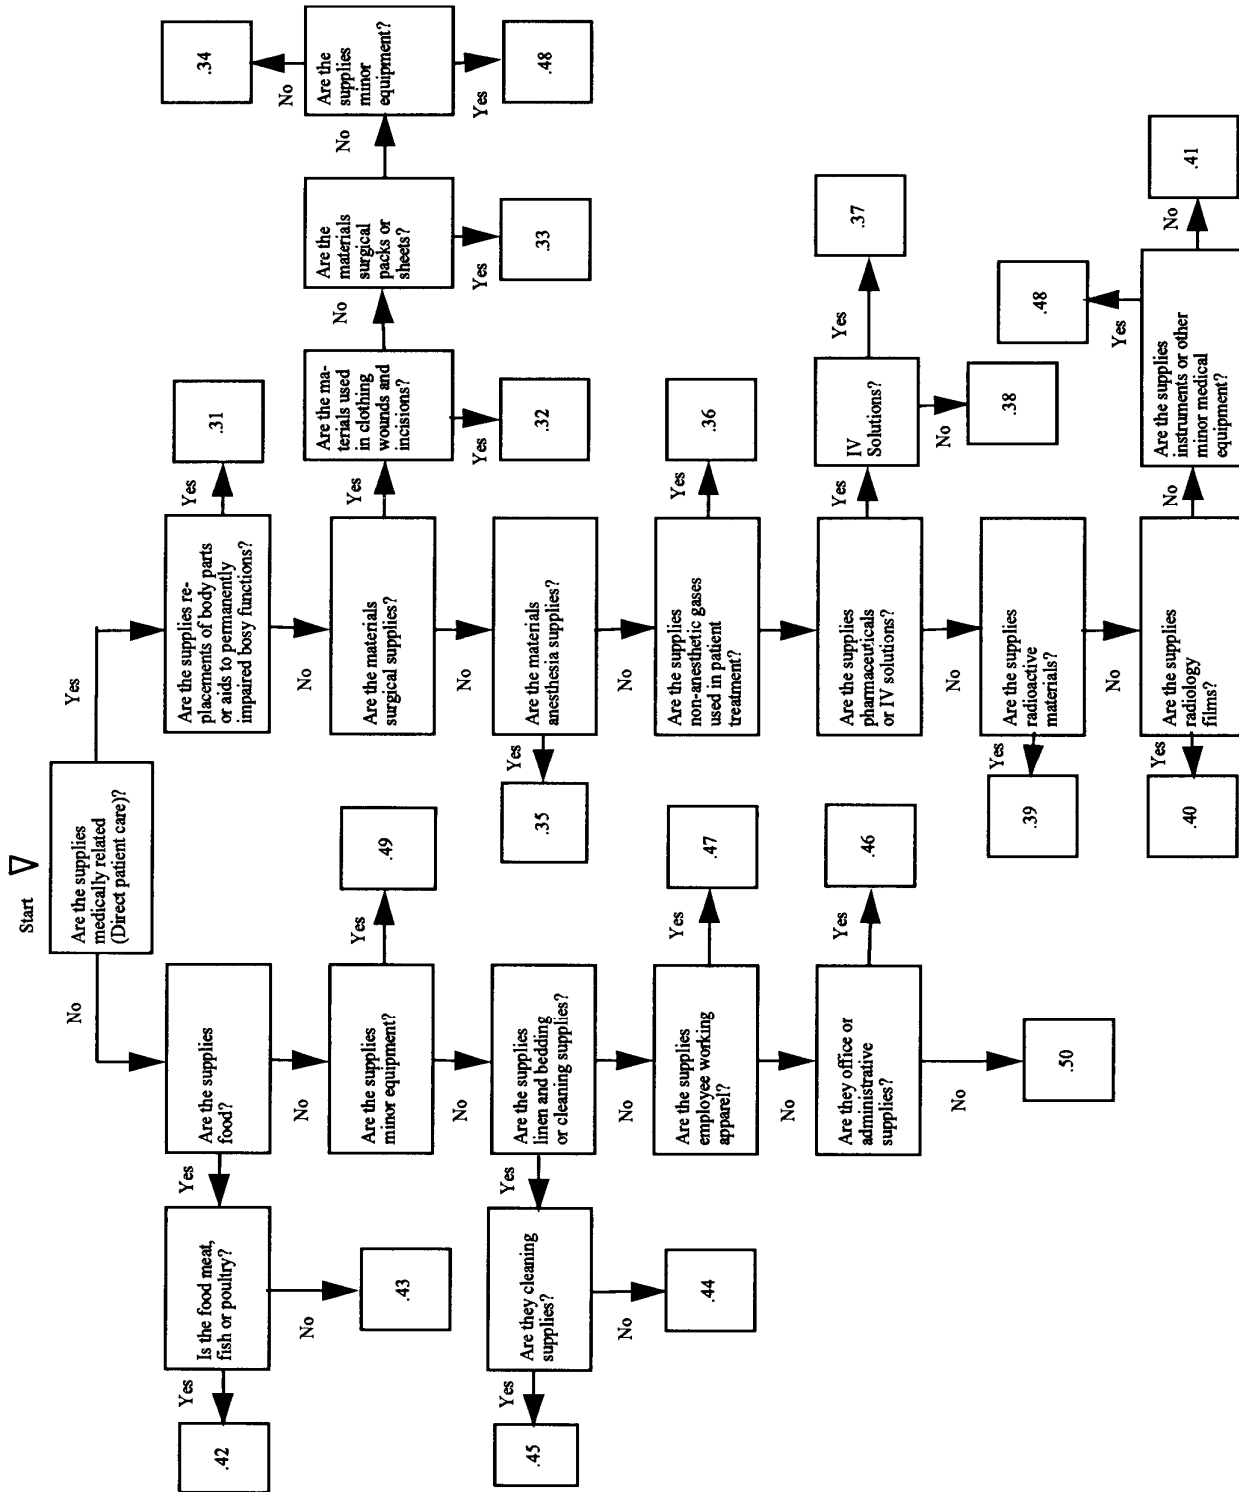

It will be noted that many of the items listed are not referenced to a single cost center, but to the "using" or "appropriate" cost center (these are indicated by the letters a through l as listed below). These are items commonly used in more than one cost center, whose cost must be recorded directly in or by interdepartmental transfer to the using cost center.

- (a) Using Cost Center
- (b) Appropriate Nursing Cost Center
- (c) Appropriate Surgery Cost Center
- (d) Appropriate Laboratory Cost Center
- (e) Appropriate Radiology Cost Center
- (f) Appropriate Educational Cost Center
- (g) Appropriate Food Services Cost Center
- (h) Appropriate Cost Center
- (i) Cost Center to which employee is assigned
- (j) Appropriate Balance Sheet Account
- (k) Appropriate Natural Classification
- (l) Appropriate Salaries and Wages Classification

The following flow chart has been provided to assist in determining the appropriate natural classification for supply expenses.
